

Skillzy — Social Media & Content Handover

Everything a content creator or social manager needs to post about Skillzy without getting it wrong. Written 2026-09-03.

1. The one-liner

Skillzy is a global marketplace for drop-in AI agent upgrades. Claude Skills, MCP servers, agent setups, prompt packs, guides, and loops — built by creators worldwide, ready to plug into any agent.

If you have three seconds, that’s the line. If you have thirty:

Every founder is trying to build the same AI agent from scratch. Skillzy sells the shortcut. Real creators publish drop-in Claude Skills, MCP servers, prompt packs, agent setups, loops and guides. You buy one, drop it in, your agent gets the job done. Creators keep 80%. No subscriptions. No lock-in.

2. What we sell (six product types)

TYPE	WHAT IT IS	PRICE RANGE
Skill	Drop-in capability files (SKILL.md, prompts, configs). Extends what an agent can do.	\$9 – \$109+
Guide	A how-to people read. Playbook, not a program.	\$9 – \$59+
Prompt Pack	10+ prompts for a specific role or workflow.	\$9 – \$79+
MCP Server	Packaged tools + data sources for any MCP host (Claude, Cursor, Windsurf, ChatGPT).	\$29 – \$149+
Loop	Scheduled workflow. Runs itself on a cron.	\$29 – \$149+
Agent Setup	The whole agent, end to end. Best margins.	\$49 – \$999+

Every listing works with one or more platforms: **Claude Skills** · **Claude** · **MCP** · **ChatGPT** · **Grok** · **Grok Bots** · **Gemini** · **Cursor** · **Windsurf** · **OpenClaw** · **Manus** · **Hermes** · **Ollama** · **Mistral** · **DeepSeek** · **n8n** · **Make** · **Zapier**.

Grok vs Grok Bots — they're two separate chips on purpose: - **Grok** = anything targeting xAI's Grok API / model generally. - **Grok Bots** = a **custom Grok persona/character** packaged as a drop-in bot (system prompt + persona + tool pack). This is where a lot of interesting creator work is landing in 2026.

3. Who it's for

Creators — engineers, ops people, agencies, indie builders who've already built something that works. They upload it, we handle payments, they get paid forever.

Buyers — founders, solopreneurs, small teams, agencies who need an agent doing real work today, not next quarter. They pick a listing, drop it in, go.

Two-sided marketplace. Content should speak to both sides, but the buyer side is the bigger volume story.

4. Positioning — what makes Skillzy different

- **Drop-in, not DIY.** You don't need to prompt-engineer. Real operators have already done it — you're buying their work.
- **Creators keep 80%.** Standard on the platform. Not a promo, not a tier. Every sale, forever.
- **Every platform, one marketplace.** Claude, Cursor, Windsurf, n8n, Zapier, Make — we don't lock you to one agent.
- **Made by humans who do the work.** Not AI slop. Real trades, real roles, real workflows.
- **The seller keeps their name on the work.** Attribution matters.
- **Global.** Creators worldwide. Buyers worldwide. USD everywhere.

5. Voice & tone

Short sentences. No filler. Confident, not corporate.

Copy the site's rhythm:

- *"Drop in. Agent supercharged."*
- *"The whole agent. Best margins."*
- *"Handles the whole pipeline. Writes the follow-ups. Never drops a lead."*
- *"Nothing matched. Try less."*

Rules:

- Say “drop in” a lot. That’s the verb.
- Say “your agent just got smarter” or variations — that’s the win.
- Never use “solution,” “leverage,” “empower,” “unlock,” “harness,” “seamless,” “revolutionise.”
- Never write in headline-title-case for body copy.
- Curly quotes and em-dashes are fine. Emoji sparingly (a 🌟 or a → is on-brand; a rocket emoji is not).
- If in doubt: read a sentence out loud. If it sounds like a keynote, cut it.

Names:

- Product is **Skillzy** (capital S, everything after is lowercase).
- Domain is **skillzy.ai** (never .com — we don’t own it).
- The types are: **Skills, Guides, Prompt Packs, MCP Servers, Loops, Agent Setups**. Capital S on the type name in copy.

6. Content pillars — what to post about

Pick from these five buckets. Rotate. Don’t post two of the same in a row.

A. Creator spotlights

Real seller, real listing, real problem it solves. - “Meet [creator] — they built [thing] because [reason]. Now they sell it on Skillzy.” - Behind-the-scenes: how did they build the skill? Who bought it?

B. Buyer wins

“I dropped this Skill in and now my [x] does [y].” - Case studies, screenshots, before/after. - Small business owners, agencies, freelancers.

C. Explainer / education

For people who don’t know what a Skill or MCP server is. - “What’s an MCP server? (60-second explainer)” - “Claude Skills vs Prompt Packs — when to use which” - “Your agent can’t do X? There’s a Skill for that.”

D. Category deep-dives

Pick a trade or role, show what’s on the marketplace for it. - Real estate agents - Plumbers / trades - Recruiters - Freelance designers - Solo founders

E. Platform news + integrations

When Claude/Cursor/Windsurf ship something new, tie it back. - New Anthropic model → “Every Skill on Skillzy works with the new Claude.” - MCP updates → “MCP servers on Skillzy just got better.”

7. Handles, links, hashtags

Handles (all identical): - Facebook: @skillzyai - Instagram: @skillzyai - X / Twitter: @skillzyai - TikTok: @skillzyai - Threads: @skillzyai - Email: hi@skillzy.ai

Not live yet — don't tag: LinkedIn, YouTube, GitHub org.

Hashtags (mix, don't spam): Primary: #Skillzy #AIagents #ClaudeSkills #MCP #GrokBots Secondary: #AItools #Claude #Cursor #Windsurf #Anthropic #Grok #xAI

promptpack #AIcreators #agenticAI`

Links: - Marketplace: <https://skillzy.ai/marketplace> - Sell: <https://skillzy.ai/sell> - Blog / Field Notes: <https://skillzy.ai/blog> - Referral: <https://skillzy.ai/affiliates>

8. Do / Don't

DO - Show real listings, real prices, real creators (with permission). - Reply to comments in Skillzy's voice — short, useful, human. - Link to the specific listing or category, not just the homepage. - Repost creators' own launch content (with credit). - Use vertical video for TikTok / Reels / Shorts. Under 45s.

DON'T - Don't claim "Melbourne-based." We are a **global marketplace**. No city. - Don't name the founder or the operating entity publicly. It's just **Skillzy.ai**. (Ops details live in /privacy /terms — don't repeat them on social.) - Don't promise "no fees" — creators pay 20% platform fee. Say **creators keep 80%**. - Don't say the marketplace is "coming soon." It's live. Listings are buyable today. - Don't compare Skillzy directly to specific competitors by name unless the caption is airtight. Stay positive. - Don't post about the internal Wise/Stripe/payout plumbing. Buyers don't care. Creators only need to know they connect once and get paid.

9. Numbers, stats & facts you can quote

- **Creators keep 80%** of every sale.
- **Instant payout** to creators' Stripe. (Wise available for creators in countries Stripe doesn't reach — mention only if relevant.)
- **Six listing types**. (Skill, Guide, Prompt Pack, MCP Server, Loop, Agent Setup.)
- **Works with 15+ platforms** including Claude, Claude Skills, MCP, ChatGPT, Cursor, Windsurf, Grok, Grok Bots, Gemini, n8n, Zapier, Make.

- **Pricing:** \$9 minimum. \$999+ for full agent setups.
- **Global.** Creators + buyers worldwide.

10. Common mix-ups to avoid

- **Grok Companions** (Ani, Rudi, Valentine) — these are xAI’s in-app characters. They’re **not** something you can buy on Skillzy. Different from **Grok Bots**, which IS sellable — see next.
- **Grok Bots (sellable)** — creator-built custom Grok personas: system prompt + persona + tool pack, packaged as a drop-in agent. These are sellable on Skillzy under the **Grok Bots** platform chip. Do not confuse with xAI’s own companions above.
- **Claude Skills** — this is Anthropic’s own name for a distribution format (SKILL.md files). We didn’t invent the name; we’re the marketplace for them. Always capitalised.
- **MCP = Model Context Protocol.** Open standard from Anthropic. MCP servers give agents tools + data. Don’t spell it out unless the audience is technical.
- **Skillzy is not a chatbot.** It doesn’t answer questions. It sells the files/configs that make other agents smarter.

11. What just shipped (Aug – Sep 2026)

- **MCP Server** added as a 6th listing type. Big deal — MCP is now the standard for agent tools across Claude, Cursor, Windsurf, ChatGPT. First marketplace to treat it as a first-class product.
- **Platform badges refresh** — Claude Skills, MCP, Cursor, Windsurf now show at the top of the platform list. Grok still supported.
- **Homepage repositioned** to lead with Claude Skills + MCP servers (the two categories with the most current demand signal).
- **GitHub repo import** in `/sell/new` — creators paste a repo, the AI drafts the entire listing from the README + SKILL.md + configs. Removes the biggest friction to publishing.
- **Global reframe** — every “Melbourne” reference gone. Skillzy is a global marketplace, full stop.
- **Wise payouts** for creators in countries Stripe doesn’t support (India, parts of MENA/LATAM). Same 80% split, different rails.
- **Grok Bots** added as a dedicated platform chip (Sep 2026). Custom Grok personas are now a first-class target on Skillzy — creators can tag their listing `Grok Bots` and it lights up in the platform filter. Live on the homepage, marketplace filter, and SEO landing page at `/platforms/grok-bots`.

12. What’s next — content angles ready to use

Talking points the social team can start teasing / posting around:

1. **“MCP is here. So are the MCP servers.”** The MCP Server listing type is new. Content angle: explainer on what MCP is, why it matters, which platforms support it, and how Skillzy is the marketplace for it. Bring in one or two live MCP Server listings if available.
2. **“Paste your GitHub. Ship a listing.”** The GitHub import flow. Content angle: 60-second demo video of a creator pasting a repo URL and watching the AI draft their whole listing. Great for TikTok/Reels.
3. **“Global marketplace” push.** Now that the site copy says worldwide, we can lean into non-US creator stories. Especially India, LATAM, EU. Wise payout means any creator anywhere can sell.
4. **Anthropic ecosystem tie-ins.** Every time Anthropic ships a new Claude model, an MCP update, or a Claude Skills announcement — we ride the wave with “Skillzy has [X] for that.”
5. **Cursor / Windsurf angle.** Cursor + Windsurf users are heavy skill consumers. Content aimed at the developer audience: “Cursor rules for [role]. Drop-in.”
6. **The 80% story.** Recurring reminder pillar. Creator quotes: *“I got paid \$[X] this month. I didn’t do the work again.”* Compare to typical platform splits (30-70).
7. **“Every founder is building the same agent.”** Positioning post. Twitter/X thread + LinkedIn (once live). Skillzy is the way out — buy the shortcut.

8. **“Grok Bots — sellable on Skillzy.”** New in Sep 2026. Content angle: creators can now package their custom Grok personas as drop-in bots (system prompt + persona + tools). Perfect for X/Twitter (Grok’s home turf) — riff on the Grok Bots hype but ground it: *not* the xAI companions (Ani, Rudi, Valentine), the **creator-built** ones. “Built a Grok Bot? Sell it.” Landing page: [/platforms/grok-bots](#) . Great pairing with the MCP push above — both are “here’s the new distribution surface, Skillzy is the marketplace for it” beats.

13. Where to find stuff

- **Live listings:** <https://skillzy.ai/marketplace>
- **The blog (Field Notes):** <https://skillzy.ai/blog> — good source material for social posts, quote-cards, etc.
- **How it works:** <https://skillzy.ai/how-it-works>
- **The Sell page:** <https://skillzy.ai/sell> — send creator leads here.
- **Refer & earn:** <https://skillzy.ai/affiliates>
- **Contact:** hi@skillzy.ai

Questions or “can I say this?” — check with Toby before it goes live.
